The **INID XS** reader product family consists of different models that incorporate an identical main PWA (**NGRP-XS**) that has integral: Power Section, I/O Section, Digital Processing Section, HF Section and Antenna, LF Section and Antenna and Keyboard Section. The base model (5045C) incorporates all sections. Through selective component placement the HF, LF and PIN sections may be removed to create five derived models.

The integral I/O Section of the main PWA is equipped with two interfaces that are software selectable. The main board is placed within different plastic enclosures that do not impact compliance for Safety, Radio, Emissions and Immunity requirements. In addition, other PWA's may be added to the main PWA integral to the plastic enclosure to add functionality to the device (e.g. a SAM interface, biometrics).

In cases where the basic geometries may affect compliance, prescans are performed in order to identify the worst case model. All Engineering justifications and/or compliance impacts are addressed within the report in the form of additional testing and/or notes.

| MultiSmart XS | | | | | |
|-----------------------|-----------|-------------|--------|-------------|---------------|
| Model | HF | LF | Keypad | FCC ID | IC ID |
